

## **Title: Fictional Trajectories**

### **Artist Statement**

My work revolves around architectural spaces to depict emotions, feelings and the trauma of incidents that I have collected from published newspaper articles. By fictionalizing and decontextualizing the details of these stories I have translated certain feelings and emotions to my canvas using various design elements and distinct color palettes in my paintings. To create a sense of stillness in spite of the alluring perspective I have painted the edges of all the angles pristinely to take life out of it. I staged these spaces narratively restraint to evoke certain thoughts that would create room for the viewer to connect with these artworks individually.
